

# Bash Shell Scripting

**Define a Function and Calling a Function**

```
#!/bin/bash
```

*Learn how to automate common tasks using bash shell scripting*

# Defining a Function and Calling a Function:

- Two ways to define a function:

```
function function_name  
{  
    commands/statements  
}
```

```
function_name()  
{  
    commands/statements  
}
```

- Calling a function is exactly same as calling any command
