Logical Operators

➢ **Logical AND Operator   && or -a**
  ➢ will compare two inputs & if both are true, it will return true else false.
➢ **Logical OR Operator || or -o**
  ➢ Will check two conditions will return true, if any of them is true & return false when both are false.
➢ **Logical NOT Operator !**
  ➢ will return true when the condition is false & return false if the condition is true.

Thank you
